

Purohith Connect — Top-Class Web App End-to-End Estimate

Production-grade web marketplace for verified priests · No mobile app in this plan · Prepared for the Founder

Scope promise: This document lists *everything* required to take Purohith Connect from the current Phase-1 MVP to a top-class, revenue-earning, compliant, secure and observable web marketplace comparable to Urban Company / BookMyPandit / MyPoojaBox — with **nothing missed**.

1. Full Feature Blueprint (20 buckets)

1.1 Backend foundation & API

- Versioned REST APIs /api/v1/* with consistent error contract
- Structured logging, request tracing, correlation IDs
- Rate limiting per IP / per user / per endpoint
- Global input validation, sanitization, XSS/SQLi/NoSQLi guards
- File & media storage (priest IDs, photos, invoices) via Emergent object storage
- Database indexes, TTL fields, pagination standards

1.2 Authentication & User Management

- Phone OTP live (MSG91 / Twilio, DLT-compliant)
- JWT access + refresh tokens, secure httpOnly cookies
- Multi-role: Customer, Priest, Admin, Support agent
- Password-less flows + optional Google OAuth for admin
- Session listing + logout-from-all-devices
- Brute-force protection, account lockouts, IP allow/deny lists for admin

1.3 Priest Onboarding & KYC

- Multi-step onboarding wizard with progress save
- ID proof + certificate uploads (image compression, OCR ready)
- Priest gotra, veda, specialisation, languages, service radius
- Admin verification workflow with document viewer, notes, audit trail
- Automatic status emails/WhatsApp on approve/reject

1.4 Catalog, Search & Discovery

- Full pooja catalog with categories (Shubh Karyas only)
- Priest listing with reviews, distance, price, availability
- Search + filters: pooja, language, area, price, rating, availability
- Sorting: relevance, distance, price low → high, rating
- Featured priests, "Trending in your area", "Muhurta today"

1.5 Cart, Checkout & Bookings

- Multi-pooja cart + saved-for-later
- Address book with Google Maps autocomplete + Kannada support
- Date+time picker with priest availability + auspicious muhurta hints
- Booking timeline: created → paid → confirmed → in-progress → completed

- Reschedule + cancellation policy engine with automatic refund rules
- Priest calendar & blackout dates (festivals, personal off days)

1.6 Payments & Invoicing

- Razorpay live checkout + webhooks + idempotent handling
- UPI, cards, netbanking, wallets, EMI
- Refunds + partial refunds + auto-refund on cancellation
- GST-compliant invoice PDFs auto-emailed & WhatsApp-sent
- Platform commission / take-rate config (per pooja / per priest tier)
- Priest wallet, earnings ledger, auto-payouts via Razorpay X
- TDS/TCS handling, downloadable statements

1.7 Notifications

- Twilio WhatsApp Business — full booking lifecycle templates
- MSG91/Twilio OTP SMS
- Transactional emails (Resend/SendGrid): OTP, booking, invoice, payout
- In-app notification centre with read/unread state
- Admin-triggered broadcast announcements

1.8 Reviews, Ratings & Trust

- Post-booking review + rating (5-star + optional photos)
- Priest response to review
- Moderation queue with profanity + spam filter
- Aggregate priest score + verified-booking badge
- Report/flag review workflow

1.9 AI-Powered Features (Emergent LLM key)

- Existing "Help me choose a pooja" — enhanced with context
- AI muhurta / auspicious date & time suggester
- Natural-language booking ("Book Satyanarayana pooja next Saturday morning")
- Auto-translate reviews and priest bios (Kannada ↔ English ↔ Sanskrit)
- AI summariser for admin (weekly ops digest)

1.10 Loyalty, Referral & Growth

- Referral program (customer → customer, priest → priest)
- Coupons / promo codes with rules engine
- Wallet credits, festival cashback campaigns
- Loyalty tiers (Bhakta / Sadhaka / Guru) with perks
- Share previews for WhatsApp / Instagram / X per pooja & priest

1.11 Customer Support & Disputes

- In-app help centre + FAQ
- Contact-support ticket flow (with attachments)
- Admin/support inbox with SLA timers
- Dispute & refund console with evidence trail
- WhatsApp bot for booking status

1.12 Admin Console (full ops)

- Dashboards: GMV, bookings, cancellations, top poojas, priest performance, cohort retention

- Booking manager: search, filter, force-cancel, refund, reassign
- Priest manager: verify, suspend, boost, edit
- Customer manager: view profile, bookings, wallet, ban
- Coupon & pricing management
- Content moderation
- Broadcast announcements
- Role-based access (Admin, Ops, Support, Finance)

1.13 Analytics, BI & Reporting

- Google Analytics 4 + Meta Pixel + custom events
- Funnel: landing → search → priest → checkout → paid → completed
- Downloadable CSV/Excel exports (bookings, payouts, GST)
- Daily ops digest to founder via WhatsApp/email

1.14 SEO, Content & Landing

- Programmatic SEO pages: *"Griha Pravesham Pooja in Jayanagar"*
- schema.org LocalBusiness, Service, Review markup
- Sitemap.xml (dynamic), robots.txt, canonical URLs
- OG images per pooja & per priest
- Blog scaffold with Kannada + English posts (10 starter articles)
- Landing page A/B experiment framework

1.15 Compliance & Legal

- Terms, Privacy, Refund, Cancellation, Community Guidelines (EN + KN)
- DPDP Act 2023 (India) consent + data-access requests
- Cookie banner + preferences
- GST invoice format compliance
- Priest agreement (digital signature ready)

1.16 Security

- Helmet-style headers, CSP, HSTS, no clickjacking
- Secrets via env only; no key in code
- Encryption at rest for KYC docs
- PII redaction in logs
- Vulnerability scan (dependency audit + OWASP top-10 pass)

1.17 Performance & Scale

- Server-side pagination, cursor-based lists
- Image CDN + lazy loading + AVIF/WebP
- Route-level code splitting
- Caching strategy (priest listing, catalog)
- k6 load-test scripts for Ugadi / Diwali / Ganesh Chaturthi spikes

1.18 DevOps, Monitoring & Backups

- Sentry error tracking (backend + frontend)
- Uptime pinger + status page
- MongoDB nightly backups + restore drill
- Staging environment separate from production
- Emergent deployment health checks

- Rollback playbook

1.19 Content & Marketing Deliverables

- Additional posters (Kannada / English / Sanskrit)
- Priest ID card PDF template
- Booking confirmation PDF template
- WhatsApp broadcast templates set
- Investor / pitch one-pager PDF

1.20 Localization & Accessibility

- Full Kannada + English + Sanskrit strings
- RTL-ready structure (future-proof)
- WCAG AA colour contrast pass
- Keyboard nav + screen-reader labels on all interactive elements

2. Effort & Credit Estimate — per bucket

#	Bucket	Active days	Credits (low)	Credits (high)
1	Backend foundation & API	1.0	90	140
2	Authentication & User mgmt	0.8	70	110
3	Priest Onboarding & KYC	0.7	60	95
4	Catalog, Search & Discovery	0.8	70	110
5	Cart, Checkout & Bookings	1.5	130	200
6	Payments & Invoicing	1.4	130	200
7	Notifications (WhatsApp/SMS/Email)	1.0	90	140
8	Reviews, Ratings & Trust	0.5	45	70
9	AI features	0.7	65	100
10	Loyalty, Referral & Growth	0.8	75	115
11	Customer Support & Disputes	0.7	60	95
12	Admin Console (full ops)	1.5	140	210
13	Analytics, BI & Reporting	0.6	50	80
14	SEO, Content & Landing	0.9	75	120
15	Compliance & Legal pages	0.5	45	70
16	Security hardening	0.5	45	70
17	Performance & Scale	0.5	45	75
18	DevOps, Monitoring & Backups	0.5	45	75
19	Content & Marketing deliverables	0.4	35	60
20	Localization & Accessibility	0.5	45	70
GRAND TOTAL (top-class web, nothing missed)		~15.3 d	~1,410	~2,205

Recommended budget: ~1,800 credits for the full top-class web build. This includes ~20% buffer for testing loops, design polish and user-requested tweaks.

3. Calendar Timeline

Sprint	Buckets shipped	Active days	Calendar (best case)	Calendar (with 3rd-party waits)
Sprint 1 · Foundations	1, 2, 3, 16	3.0	4–6 days	1 week
Sprint 2 · Money & Bookings	4, 5, 6, 7, 8	5.2	7–9 days	2 weeks (Razorpay KYC + WhatsApp template approval)
Sprint 3 · Growth & AI	9, 10, 11	2.2	3–4 days	1 week
Sprint 4 · Ops & Insight	12, 13, 15	2.6	4–5 days	1 week
Sprint 5 · Launch grade	14, 17, 18, 19, 20	2.3	3–5 days	1 week
Total	Full top-class web app	~15 days	~3.5 weeks	~6 weeks

4. Inputs Needed From You

Sprint	What you provide
Sprint 1	Nothing (I can start immediately)
Sprint 2	Razorpay live keys · MSG91 DLT header · Twilio WhatsApp sender · Google Maps API key · Resend/ SendGrid key
Sprint 3	Referral incentive amounts & coupon rules (business call)
Sprint 4	List of admin/ops team emails · commission percentages · GST number
Sprint 5	Sentry DSN · uptime endpoint · logo/brand assets if any updates

5. Third-Party Monthly Costs (paid by you, not Emergent)

Service	Cost
MSG91 / Twilio OTP SMS	₹0.15–0.30 per SMS

Service	Cost
Twilio WhatsApp Business	₹0.40–0.80 per message
Razorpay	2% + GST per transaction
Razorpay X payouts	₹5 flat per payout
Google Maps API	\$200 free / month, then usage
Resend / SendGrid email	Free tier up to 3k emails/month
Sentry	Free tier (up to 5k events/month)
Object storage	Included via Emergent playbook (no separate key)
Emergent LLM key (AI)	Auto top-up, usage based

6. Definition of "Done" for this plan

- All 20 buckets shipped to production URL *purohithconnect.com*.
- Automated tests (backend + critical UX flows) pass on every deploy.
- Real customer can book, pay, receive WhatsApp updates, get GST invoice.
- Real priest can register, get verified, receive bookings, receive payout to bank.
- Admin sees live GMV, cohorts, disputes, ops dashboard.
- Legal pages live, DPDP compliant, SEO indexed.
- Sentry, backups, monitoring active. Rollback playbook documented.

Document v1.0 · Prepared by Emergent E1 for Purohith Connect · Bangalore, Karnataka

Credit ranges include a ~20% buffer for testing loops. Actual credits depend on scope changes, third-party approval times and QA iteration count.
